Aflatoxin Feed Test (monthly)	not available here. There are rapid tests somewhere. Can test in dakar in lab that waas for pan african aflatoxin control project or something. Or can test milk or urine which is easier than testing hay				
Dimbasul (bloat remedy)	Can give mineral oil. Shouldn't be a big issue for goats with caution with feed				
Diminazine aceturate (tryps)	readily available. not expensive may not be able to buy here. Can get in dakar. Would be handy to have. Maybe can make yourself with powder? Then lasts forever				
Calcium	never been tested here				
Coccidiostats					
Amatrx (pour on insect repellent)	more expensive, just do tablets or injection. WADs should have least ticks of all				
CMT Reagent	not available here				
Fecal Solution	Just use water and salt. Saja can make it himself				
Slides	are in ITC and and kombo vet				
Syringes	can buy in pharmacy, cheap				
Needles	can buy in pharmacy, cheap				
EDTA Tubes	can buy in pharmacy . Ask for vacutainer in mahlak pharmacy next to peace corps				
Gauze	can buy in pharmacy, cheap				
Nitrile gloves (vet care)	can buy in pharmacy, cheap				
Alcohol	can buy in pharmacy, cheap				
deworming tablets or drench	GMD 10 per animl. Do 2-4 times per year. So 40D per animal per year bottle is 250D, 50mL. Need 1mL per 50kg goat. Per animal 10D per animal. Goat wont weight 50kg				
tick tx (bottle of ivermectin)	double ear tag animals w/ different colors. Sold at kombo vet service. 100 tags for 800 dal. So 17dal per animal (2 tags of different colors w/ same #)				
ear tags					
PPR vac 2x year	GMD 5 per animal per dose. In bottles of 100 doses				
pasteurella	GMD 5 per animal per dose. In bottles of 100 doses				
clostridial vaccine	8 way not from him, from DLS but don't need blood sampling shortly after start to check for tryps. Saja can do it, can take samples and analyze blood. Need edta tubes (not that expensive, ask ITC. can buy at human pharmacy w/ needles and syringes, or at agrovvet				
blood sampling					
abx pen and oxytet	300GMD to 350 for bottle
