3<sup>rd</sup> November 2016

Dear Committee Members,

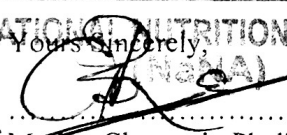

The National Nutrition Agency (NaNA) of The Gambia is the foremost public research and policy-making institution operating within The Gambia, with the goal of improving the nutritional status of all Gambians.

In regard to the development of a Goat Dairy operation for the Sulayman Junkung General Hospital in Bwiam, we worked closely with Corey Spies and Brianna Parsons from the University of Pennsylvania as they carried out a feasibility study in The Gambia. We also participated in a consultative workshop hosted by these veterinary students involving many Gambian stakeholders.

We consider this prospective project a laudable one given the meticulous steps taken in conceptualizing the project and in drafting the proposal. We are optimistic that this project will contribute to solving the challenge of malnutrition in the project community and in The Gambia at large.

With this letter, we indicate our interest in The Gambia Goat Dairy and support of the initiative. If the project secures funding, we would like to continue working with the project team in ensuring a judicious use of the available resources and knowledge.

Kind regards,

Yours sincerely,  
  
.....  
Modou Cheyassin Phall.....  
Executive Director
